NOIDA, June 2017: CP PLUS, India's No.1 security & surveillance brand, recently launched the Ultra HD Analog range of cameras and DVRs. Designed to offer high resolution imagery for revolutionary clarity, this range will mark a major shift in the capabilities of analog surveillance systems.

“The Ultra HD Analog range is great for those who are looking for an IP equivalent performance in analog. It offers excellent image clarity coupled with Edge Analytics for smart surveillance - a feature that was akin to IP thus far. What's more, these cameras produce brilliant images even in low light conditions, while the edge analytics ensure no trespassing goes unnoticed”, said Mr. Yogesh B. Dutta, COO – CP PLUS.

CP PLUS Ultra HD Analog range marks a significant shift in the quality of imagery from its earlier counterparts. This range includes Ultra HD 4MP cameras and DVRs that offer distinct, detailed images even in low light conditions. That's not all; this solution range is equipped with Edge analytics with features like trip wire, intrusion detection, face detection, etc. which make them responsive to any unusual occurrences within a premises.

Due to hit markets late this monsoon, these cameras will make upgrading your existing analog system hassle-free and cost-effective, thereby offering the best results without requiring major overhauls.

CP PLUS

CP PLUS is the No.1 brand in advanced surveillance and security systems in India. Its extensive range of security solutions and products are monitoring millions locations across the globe in diverse geographies, from highly sensitive defense locations, government buildings, vital infrastructures, transportation, hotels, hospitals, educational institutes to homes with satisfied customer base.

CP PLUS' success is largely attributed to its strong R&D in technology and its customer first market approach, thereby delivering the best value.
