

CP PLUS Commences Its CCTV Surveillance Certification Programs

NOIDA, September 2018: CP PLUS, the global leader in security & surveillance, has launched a special initiative to train and certify its partners and system integrators. These certification programs are focused on training and educating Surveillance System Engineers (SSE) on Installation, Operation and Maintenance of CP PLUS Products; designing Intelligent Security Solutions and providing lifetime sustenance for complete customer satisfaction.

“We are in the Golden Period of the Electronics Industry where surveillance has become an integral part of infrastructural development. With an aim to deliver customized, robust and scalable solutions across verticals and deliver value, CP PLUS has launched the Mission Tech Certified Training Program which is focused on bridging the knowledge gap of our customer touch points, i.e., our partners and system integrators. These training programs entail both concept fundamentals and hands-on training for optimum learning”, said Mr. Aditya Khemka, MD, CP PLUS.

This training program aims to impart globally relevant, surveillance solutions training to the system integrators and partners; upgrade their skills for effective and efficient solution designing; enable them to deliver customized, robust and scalable solutions across verticals and deliver value by designing and implementing the most relevant solution and thereby ensuring ROI.

The program offers three levels of certification – CP PLUS Certified Surveillance Engineer (CSE) | CP PLUS Certified Surveillance Professional (CSP) | CP PLUS Certified Surveillance Designer (CSD). The courseware is based on the Indian environment so that system integrators can deliver robust and scalable security solutions for the Indian market. The CP PLUS Certification Program is open to all individuals in the video surveillance industry with a minimum 6 months experience in the business.

CP PLUS commenced its training sessions on 25th September and has successfully completed 2 batches of trainings so far certifying almost 50 partners.
