

## CP PLUS Showcases Surveillance Powered by Artificial Intelligence at SECUTECH 2018

---

In an elaborate showcase at SECUTECH 2018, CP PLUS, the global leader in advanced security and surveillance solutions, laid out its latest and best technologies and solutions on display.

SECUTECH is India's premier security exhibition which sees one of the largest turnouts of regional and global players from the security and safety industry. It attracts security patrons from world over, including dealers, distributors, system integrators, CFO, CIOs and CSOs. In this edition, the focus of SECUTECH India was on Integrated Building Management System (IBMS), Smart Cities, Smart Homes, Internet of things, Cyber Security and Homeland Security.

***“As always, it was a great show. In this edition, our main feature has been the new age intelligent surveillance solutions driven by AI and Internet of Things (IoT). Smart, dynamic, and efficient, these technologies will define the future of surveillance”,*** said Mr. Yogesh B. Dutta, COO, CP PLUS.

Key technologies on display included Banking solution for securing all aspects of the banking system; Education solution for complete campus security; Retail solution for end-to-end security in stores and supermarkets; AI - Intelligent surveillance using analytics and deep learning; Industrial Solutions for providing state-of-the-art solutions for extreme environments ; Transport solution for

in-transit surveillance; Enforcement solution for facilitating law enforcement bodies and ensure agility at all times; Real Estate solution for smart surveillance in homes; and IoT + IP for smart, next generation surveillance.

The CP PLUS arena garnered huge response with high footfall as visitors flocked the aisles showcasing different solutions curious to learn more about the technologies.
