

## CP PLUS enhances security at the Taj Mahal with the Latest Hi-Tech IP-based Body-Worn Cameras & a Video Wall System

In the most recent feat achieved by the nation's leading surveillance brand, CP PLUS has pioneered the industry once again by securing the Taj Mahal, India's addition to the Wonders of the Worlds. In a one-of-a-kind initiative to ensure the safety and security of the remarkable monument as well as its visitors, CP PLUS has designed and proposed a project to enhance the security as well as public safety at the world-famous sight, which millions visit every year. In the first step of the project, CP PLUS designed a customized solution to enhance security on behalf of the Archeological Survey of India.

The Taj Mahal is now secured with the most advanced and hi-tech CP PLUS Body-Worn Cameras, which stream live video feed onto the Video Wall System as well as high-performance armored Cat6 cables that CP PLUS installed in the Central Command Control Room at the Taj Mahal. Through this, the responsible authorities have been able to create a geo-map of the premises, making sure no dark spots are left out and soon the entire area can be put under effective surveillance.

CP PLUS recognized that the Taj Mahal required advanced, integrated, and cost-effective solutions that proactively help in deterring as well as detecting vandalistic and criminal behavior. Proficient and dedicated surveillance through well-structured security systems along with effective monitoring are the main aspects here to prevent mischievous activities and regulate or control suspicious people, objects, and vehicles. The project has been conducted swiftly where CP PLUS is responsible for supplying, installing, testing, commissioning, and CAMC of Body-Worn Cameras.

CP PLUS architected the project with a tailor-made customized solution to secure the area and provided advanced, embedded devices. The networking setup for the project, the designing, and the execution of the solution were all conducted at a centralized location within the Agra district.
