4G Surveillance Camera

| NO Wi-Fi • NO WIRE • NO WORRY

Model No.
CP-V33GN
3MP 4G Camera

3MP Camera

Designed to represent an enhanced picture quality in video so that every detail can be viewed with vivid clarity and a pixilated video feed can be avoided.

4G Support

To eliminate the hassle of cables and switches, this camera has been 4G enabled which makes it easier and better to conduct surveillance of any closed space.

Motion Detection Alerts

Motion Alert technology allows you to get immediate alerts as soon a single motion is detected in the scene. This feature has reduced the effort put in surveillance by copious amounts and has eased the life of millions.

Human Body Detection

Designed to provide human detection and intelligent alerts, which means only being alerted only when the need occurs as the camera detects people as opposed to animals, passing vehicles, or other inanimate moving objects.

Privacy Mode On

Privacy Mode

Using privacy mode, you can block the camera view & recording of a specific area of your choice to maintain privacy.

View & Talk

Enables you to stay in touch with your loved ones from anywhere, meaning you can also talk while viewing the live video feed on the phone.

Full-Color Video

See every detail, even after dark. Designed to capture vibrant colors for clear identification, this camera provides much better video clarity, where every color can be viewed in detail while also enjoying a high-resolution video stream. Identify intruders with ease thanks to crystal-clear night vision.

Supports ONVIF

Provides device freedom with ONVIF as it supports cross-compatibility with third-party Recorder/software via ONVIF protocol to enhance native integration. Helps your security system operate seamlessly so that you can mix and match recorders and software for more flexibility.
