

How to connect audio to DVR

How to connect audio to DVR:

Settings for enabling Audio for Recording and LIVE:

1. Go to **Main Menu** → **Camera** → **Encode**

You have to just enable the option of audio in the encode option for every channel having audio option in it.

2. After enable the audio, go to live view and click on the audio icon, as shown in below figure

Audio Mic connection with DVR:

First you have to make the proper connection for Audio MIC with power & RCA Connector. Kindly follow the below image

- Connect MIC Red wire with power +VE wire.
- Connect MIC Black wire with power –VE wire.
- Connect MIC Green wire with RCA connector core.
- Connect MIC Black wire with RCA connector ground.
